RE: Cigna File: 230 P 64 03 46-3
Insured: LADWP/IPSC
Type of Loss: Burner Damage (Unit #1)
D/Event: March 1991
Location: Delta, Utah
HI File No.: L-1225

Subject: Request for Documents and Drawings of the Unit #1 Burner Design and Related Equipment.

Dear Ms. Fuchs:

Thank you for taking the time to meet with Bob Wilson and me on March 17, 1993. This letter is in response to your request for a written list of documents and drawings relating to the subject burner loss. Since I do not know what specific documents exist, I would hope that pertinent items not specifically covered in my request list would also be furnished to us. I am available to come to your office to review drawing and document files if this would help speed up the selection process.

In general, I am interested in any and all documents and/or drawings that bear on the specification, design, engineering, installation and modification of the Unit #1 coal burners. Any and all correspondence with B & W and your consultant R.J.M. concerning the modifications to the burners.
